Stakeholders

Who is involved?

#1 Mayor and City Hall Commission

#2 Union Reps

#3 Senior Employees

#4 Field and Shift Workers

#5 Employees in General

#6 Managers and Team Leads

#7 HR and Accounting

#8 Top Management

Difficulties and Solutions

#1 **State Synchronization**

Ensuring clock status changes and breaks update dynamically across employee dashboards and manager views without manual refreshing.

#2 **Role-Based Security Routing**

Implementing strict permission boundaries allowing managers to modify team structures while giving admins global oversight.

#3 **Data Integrity**

Handling irregular session durations and overlapping break/work entries gracefully within database records.

Conclusion

The Time Manager project successfully delivers a streamlined, role-tailored workspace solution.

Solves core organizational transparency challenges through granular controls and live oversight.

Communication tools: utilizing task boards, repository tracking, and instant messaging.
